CESAR AMAYA GOMEZ

Junior Full-Stack Developer |
Security-Focused Approach

I have completed my degree in Systems Engineering. I am interested in understanding how systems work beyond simply making them run, and in contributing responsibly by working on existing solutions without complicating team workflows. I adapt quickly to new technologies and work environments, and I enjoy learning from more experienced professionals. I prefer building solid knowledge rather than improvising. In addition to my technical background, I have experience in social and operational roles, where I developed strong communication, organization, and adaptability skills. I am seeking an opportunity to grow professionally within a collaborative team.
